## Practical guide for plant protection

This monthly magazine brings tabular overviews of plant protection products in the form of an attractive design. Introduced products used to reduce the presence of harmful factors (weeds, diseases and pests) are divided by crop. They are supplemented by the main characteristics, important when deciding on treatment. Some issues also provide information on the varieties of the main agricultural crops, the important characteristics and parameters which are clearly summarized in the individual tables. The magazine also includes folding flaps dealing with the occurrence of harmful factors regarding the developmental stages of selected agricultural crops. Emphasis is placed on the timeliness of the provided information. Detailed tabular reports every month.
